# DAYA SHANKAR

| | | |
|---|---|---|
| **PROFILE** | Experienced Software Developer \| 7+ Years of Expertise \| Proficient in .NET Technologies, React, Angular, Node.js, and AWS/Azure DevOps \| Demonstrated Success in On-Time Project Delivery with Cross-Functional Teams \| Strong Workload Management and Quality Assurance Skills \| Deep Understanding of Web Technologies and Frameworks. | |
| **KEY SKILLS** | | |
| | **Programming Languages** | C, C#, Python, JavaScript, Typescript, SQL, HTML, CSS |
| | **Development Technologies** | Micro Services. React js, Angular, Node js, Dotnet (MVC), Dotnet Core , Web API, Windows forms, windows services,<br>HTML, jQuery |
| | **Database Technologies** | relational (MS SQL, MySQL, PostgreSQL, Cockroach DB, SQLite) and non-relational (MongoDB, Cosmos DB) |
| | **Deployment Technologies** | Kubernetes, AKS, Octopus, Docker, IIS, Virtual machines, Bamboo CICD, Github Actions CICD |
| | **Cloud** | **AWS**(EC2, ECS, EKS, Elastic Beanstack, SES, RDS)<br>**AZURE**(Virtual Machines, App Services, AKS, Azure SQL, Cosmos DB, Blob Storage, Kafka, Event Hub)<br>**GCP**(VMs, Blob Storage, Kafka, GKS) |
| | **Repositories** | Git, Bitbucket, SVN, TFS, FTP |
| | **AI** | Copilot Pro(used in industrial project) and Chatgpt |
| | **Others** | JIRA, Confluence, Sonarqube, Coverity, Twistlock, BlackDuckHub |

## EXPERIENCE

### CONCENTRIX CATALYST, BANGALORE

FEB-2022 - Present

**Project: Honeywell's Connected Plant System**

Honeywell's Connected Plant System is a suite of technologies designed to enhance the efficiency and reliability of industrial processes. It integrates advanced software, sensors, and analytics to provide real-time insights into plant operations. This system allows industries like oil and gas, refining, petrochemicals, and others to optimize their processes, improve safety, and reduce downtime through predictive maintenance and data-driven decision-making. It's all about leveraging digital technologies to create smarter, more connected industrial environments.

**RESPONSIBILITIES**

- Managed over 20 cross-functional projects across a diverse tech stack including React JS, Angular, Node.js, .NET technologies (.Net core API, windows services, console applications), and various databases (MS SQL, MySQL, PostgreSQL, Cockroach DB, MongoDB, Cosmos DB).
- Implemented Kafka, Confluent Kafka, and Azure Event Hub in microservices architecture to enable high-throughput messaging, faster calculations, and efficient inter-service communication.
- Played a key role in implementing new platform features and enhancements based on business needs and customer feedback.
- Worked with team in onboarding new tenants (customers) by gathering configuration requirements and preparing tenant-specific assets such as visualization configuration files, access management settings and resource bundles
- Validated tenant setups through end-to-end testing of calculation runs, scenario simulations, and report generation workflows to ensure correct behavior across multi-tenant environments.
- Developed scalable web APIs, microservices, UI components, and backend services (including Windows Services) for industrial analytics and visualization.
- Handled CI/CD automation using Bamboo pipelines and GitHub Actions, and managed application deployments via Octopus Deploy and Azure Kubernetes Service (AKS).
- Provided production support by proactively monitoring logs using Kibana and resolving incidents with minimal downtime.

### CHETU INDIA PVT LTD, NOIDA, UP

June-2020 – FEB-2022

Meeting and gathering requirements from customers related projects and working to resolve specific concerns. Working on Dotnet core and React JS and completing projects on time following related coding structures.

**RESPONSIBILITIES**

- Meeting with clients and gathering requirements related projects.
- Developing projects Dotnet core and React JS.

- Build and deployment of code AWS and Virtual machines.
- Providing support for production issues.

**PROJECTS WORKED ON**

- Betting Site based on ReactJS and dotnet core.
- Powerball lottery website based on asp.net MVC 3. Ecommerce website based on dotnet core

## TEKYUL TECHNOLOGY, NOIDA, UP

April-2018 – June-2020

Gathering requirements from customers related projects via email and working to resolve specific concerns. Working on Dotnet (MVC, ASP.net) and completing projects on time following related coding structures.

**RESPONSIBILITIES**

- Communicating with client via email and gathering requirements and concerns related projects.
- Developing projects based on technologies Dotnet (MVC, ASP.net), Windows application, web API and SQL server.
- Build and deployment of code on AWS and Virtual machines.

**PROJECTS WORKED ON**

- Logistics website application based on asp.net.
- Logistics desktop application
- Logistics web API and Xamarin mobile app

## EDUCATION

Bachelor of Technology (CSE) from UPTU University, Lucknow, Uttar Pradesh, India.
